Alabama EMS Agency Deploys In Motion Gateway (2/25/10)

Mobile County EMS in Alabama deployed In Motion Technology's patented mobile networking solution to provide advanced wireless communications and vehicle tracking across southeast Alabama. The agency deployed In Motion's mobile gateway throughout its fleet of advanced life support vehicles.

With the Technology, headquarters staff can dispatch the emergency vehicle nearest to the scene, track it with satellite-guided precision, and reroute the vehicle around traffic, construction and other potential delays. At the scene, medics can send and receive lifesaving information including ECG data and patient care records. While en route to the hospital, the gateway can roam across wireless networks to ensure that ER staff is armed with the information they need to administer care as soon as the patient arrives.
