Clevest Announces Utility Field Operations Platform

WEDNESDAY, 18 JANUARY 2012 20:04 | 0 COMMENTS |

PREMIUM PARTNERS

Clevest Solutions has signed an agreement with In Motion Technology to offer an integrated mobile workforce management, and smart grid deployment and support, system to the utility industry. Clevest's solutions will connect the mobile workforce with In Motion Technology's onBoard system, "an in-vehicle, secure mobile router communications platform." The consolidation of communications will enable utilities to reduce costs and improve response times by automating field activity.

In Motion Technology's Vice President of Sales and Marketing, Tony Morris, says, "Clevest Solutions allow our utility customers to realize the cost-savings and efficiency gains of mobile workforce management and smart grid deployment software solutions using the most complete communications platform in the market today."

Doug Engerman, Clevest's Senior Vice President of Global Sales and Marketing says that by combining his company's solutions with In Motion's "provide utility customers with an array of efficiencies that is one of the best field operations solutions in the industry today. We value our relationship with InMotion, and believe that it only strengthens our ability to provide our customers with an outstanding view of their field operations."

In Motion Technology provides mobile networking technologies and its patented Mobile Wireless Hot Spot System turns vehicles into a mobile communications hotspot that enables people on the road to stay in constant contact. In Motion Technology's solutions are used by more than 350 utility, public safety, transportation, municipal, and healthcare organizations worldwide. For more information, visit www.inmotiontechnology.com.

Clevest Solutions provides software for mobile workforce automation and smart grid deployment exclusively for electric, gas, and water utilities.
